

Healthcare Investment Vertical Overview

With over two decades of success acquiring and managing Branded Consumer and Niche Industrial companies, Compass Diversified (NYSE: CODI) has added a third investment vertical: Healthcare. We are focused on partnering with middle-market businesses across the broad Healthcare sector, with a particular interest in outsourced pharma and medical device services. Our team has experience acquiring control positions in founder-owned companies, PE-backed, take-private transactions, and corporate divestitures.

CODI provides the entire capital structure on a transaction-by-transaction basis, thus eliminating financing contingencies and increasing speed and certainty to close. In challenging financing environments, this often makes us the buyer of choice.

Our permanent capital structure provides our subsidiaries with ongoing access to substantial growth capital to invest in people, processes, and expansion initiatives that drive transformational change.

We know the best way to create value is by aligning interests and a long-term partnership approach. We do not have limitations on holding periods for our subsidiaries which allows CODI to make decisions to drive longstanding value for all stakeholders.

We look to acquire controlling interests in companies with the following criteria:

- Headquartered in North America
- Industry leader within respective sub-sector
- Highly defensible market position
- Favorable long-term macroeconomic sector trends
- Strong management team, either currently in place or previously identified
- Stable and growing EBITDA of \$15M

Target transaction size range of \$200-\$600M, with CODI providing both the debt and equity at the close.
